

Maintenance

Perma-Tread polymer is a highly durable, impact resistant, non-absorbing, non-organic building product which requires minimal maintenance beyond normal surface washing when visibly required.

Care and Cleaning

SOAP WASH

Spray deck and stair treads with soap, then follow by gently scrubbing each deck board with a soft bristle brush. Spray/rinse each individual deck board with cold, clear water. RINSE THOROUGHLY. If dirty water from cleaning is left to dry, a film will remain on the surface.

REMOVE SURFACE DUST

To remove surface dust, just wash with cold, clear water.

PRESSURE WASH

Spray/rinse each individual deck board using a fan tip no closer than 10-12 inches from the surface. It is not recommended to use more than 1,500psi.
