Nosings

Stair Nosing and Stripe options supplied by Safe-T-Nose. Enhance the slip-resistance and visibility of the stair treads.
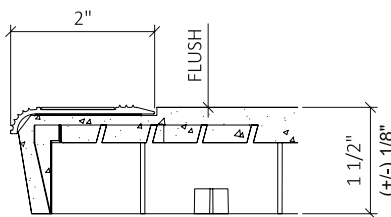

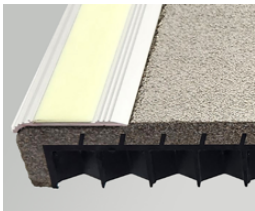

Stair Nosing / Contrasting Stripe Options
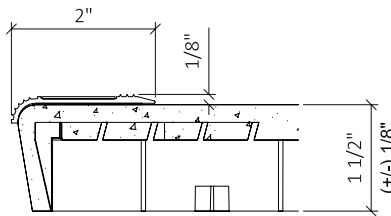

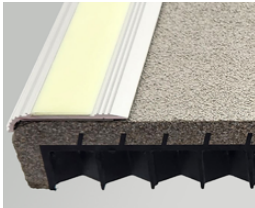

2" SURFACE MOUNT STAIR NOSING:

The most affordable and popular solution. The low profile aluminum nosing attaches to the top face. Shop applied or on site by others using recommended marine grade adhesive for a permanent application.

2" FLUSH MOUNT STAIR NOSING:

Additional costs and lead time apply. A product modification made during manufacturing to accept the stair nosing for a flush transition. The low profile aluminum nosing attaches to the recess. Shop applied using marine grade adhesive for a permanent application.
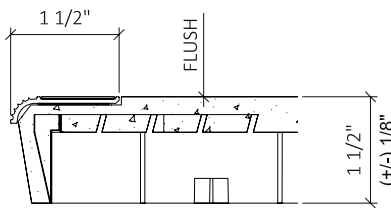

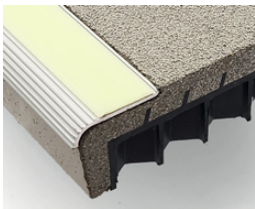

1.5" FLUSH MOUNT STAIR NOSING:

Additional costs and lead time apply. A product modification made during manufacturing to accept the stair nosing for a flush transition. The low profile aluminum nosing attaches to the recess. Shop applied using marine grade adhesive for a permanent application.
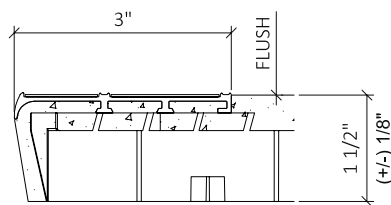

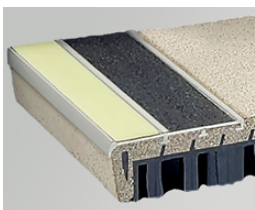

3" EMBEDED STAIR NOSING:

Additional costs and lead time apply. This nosing option is embedded into the wet concrete pour during manufacturing for a flush transition.

RHINO TRED®

Nosings

Images showcase color combinations of available aluminum nose color with insert strip options. These nosing assembly combinations offer high contrast visibility, custom look, and produce a highly non-slip stair tread for safety. Insert strip is easily replaceable for economical restoration of nosing if or when necessary. See Rhino Tred product models for nosing attachment methods.
